

## Willdan's LoadSEER Software Selected by SMUD for Electric Grid Planning and Forecasting

May 16, 2023

ANAHEIM, Calif.--(BUSINESS WIRE)--May 16, 2023-- [Willdan Group, Inc.](#) (NASDAQ: WLDN) announced today that the Sacramento Municipal Utility District (SMUD) has competitively selected Integral Analytics' LoadSEER software to support distribution grid planning and forecasting. The five-year contract includes software licensing, maintenance, and support for all levels of implementation. The contract was signed in March and discussed during Willdan's Q1 FY2023 Earnings Conference Call. Integral Analytics is Willdan's software subsidiary.

"As we plan for future improvements to our electric grid, it's important that we have a reliable, modern tool for geospatial load forecasting," said Harry Marks, Manager of Distribution Planning for SMUD. "LoadSEER integrates with our existing software, and it will inform our planning of the distribution system facilities as we move toward our 2030 Clean Energy Vision while maintaining SMUD's reputation of highly reliable service as demand continues to grow in the Sacramento region due to development, electrification, and electric vehicle adoption."

Sheikh Hassan, Principal Distribution System Engineer added, "Engineers are tackling a fast-changing utility landscape driven by a variety of DERs and electrification. A forecasting tool like LoadSEER that provides a more granular analysis is key for our Distribution Planning Engineers' tool bag."

"SMUD joins a rapidly growing number of utilities using our platform to support their distribution planning teams," said Tom Brisbin, Willdan's CEO and Chairman. "We are excited to be working closely with a large, industry-leading municipal utility like SMUD to help them determine the least-cost and most reliable grid strategies that will support their aggressive decarbonization targets."

### About the Sacramento Municipal Utility District

As the nation's sixth-largest, community-owned, not-for-profit electric service provider, SMUD has been providing low-cost, reliable electricity to Sacramento County for more than 75 years. SMUD is a recognized industry leader and award winner for its innovative energy efficiency programs, renewable power technologies, and for its sustainable solutions for a healthier environment. Today, SMUD's power supply is on average about 50 percent carbon free and SMUD has a goal to reach zero carbon in its electricity production by 2030. For more information on SMUD's Zero Carbon Plan and its customer programs, visit [www.smud.org](http://www.smud.org).

### About Willdan

Willdan is a nationwide provider of professional, technical, and consulting services to utilities, government agencies, and private industry. Willdan's service offerings span a broad set of complementary disciplines that include electric grid solutions, energy efficiency and sustainability, engineering and planning, and municipal financial consulting.
